## Corrigendum

## Corrigendum to “The woman who wasn't there: Converging evidence that subliminal social comparison affects self-evaluation” [Journal of Experimental Social Psychology, 73(2017), 1–13]

Armand Chatard<sup>a,b,\*</sup>, Yvana Bocage-Barthélémy<sup>a,b</sup>, Leila Selimbegović<sup>a,b</sup>, Serge Guimond<sup>c</sup><sup>a</sup> Université de Poitiers, France<sup>b</sup> Université de Tours, France<sup>c</sup> Université Clermont Auvergne, France

In our 2017 article in Journal of Experimental Social Psychology, we used a new open-source application to present the stimuli. **It has come to our attention that some stimuli may not have been presented correctly due to a coding error.** However, we have successfully replicated the findings in a high-powered replication study after correcting the error. Thus, the original findings were not affected by the

error and the conclusions from the article remain as they were. The new experiment script and the data of our replication are available via <https://osf.io/ps9r7/>. The first author is solely responsible for the coding error. We thank an anonymous colleague for pointing this out to us. Researchers interested in replicating our findings are encouraged to use the new experiment script.
